

Traffic, Transit and Transportation Engineering and Planning Positions

Are you seeking a challenging yet rewarding experience in the field of traffic, transit and transportation engineering and planning? And are you looking for an opportunity to continue to learn, and to grow with a team of committed professionals?

Do you have strong technical and analytical skills? Are you motivated and committed to producing quality results?

Do you have a degree in engineering or a CEIT certificate with three to five years of experience and possess good writing and communication skills?

Then, you may be the candidate we are looking for.

ENTRA Consultants is an integrated team of experienced engineering and planning professionals committed to meeting the transportation needs of our clients and the community with quality products and services. A leader in transportation planning, we specialize in integrating transportation planning with land use and urban design, traffic management, transit planning, and transit operations and facilities development. We have a solid foundation in combining traffic engineering, road design and transit operations to developing state of the art transportation solutions.

We are currently seeking various positions to complement our team. Coupled with the skills and experience previously stated, the following positions require:

Senior Transportation Engineer

- a designation of P.Eng.
- five to ten years of domestic traffic and road design experience
- experience using AutoCad, AutoTurn, Synchro, HCS, CGG software and interpreting results
- a thorough understanding of provincial and municipal design standards
- exceptional writing and communications skills
- demonstrated project management skills

Traffic Engineer

- a P.Eng. or EIT designation
- three to five years of domestic experience completing traffic impact, access and circulation assessments and operations studies
- experience using SimTraffic, HCS, Synchro, CCG (Intercalc) software and interpreting results

Transportation Demand Forecaster

- experience with modeling operations in VISUM, VISSIM and EMME
- a familiarity with GIS, database, Synchro and SimTraffic

If you are interesting in joining ENTRA Consultants please submit statements of interest and compensation expectations to:
