

An experienced, integrated team ...

ENTRA Consultants Inc. is a leader in the field of transportation planning. We have established our expertise by continually developing effective transportation planning solutions that contribute to the development of a livable urban environment and a balanced transportation system, and that recognize the mobility needs of all individuals in society.

ENTRA Consultants Inc. is an **integrated team** of experienced engineering and planning professionals, that is committed to meeting the transportation needs of our clients and the community.

By combining our engineering and planning skills, we are able to respond to those needs in a uniquely **comprehensive** manner. Our knowledge and commitment to transportation planning means we bring the most complete and up-to-date information to every project. Our team approach ensures the most effective use of resources and maximum value for our clients.

Individuals with extensive transportation planning experience and capabilities working collectively towards a common goal.

A unique approach, for planning solutions that make sense ...

ENTRA is committed to an approach that emphasizes consultation as a key component. Our extensive engineering and planning experience, combined with our consultation skills, enables us to work with stakeholders to “flush-out” the key issues.

Following the **ENTRA approach**, we develop recommendations that respond to the needs of the client and community and reflect the integration of transportation and land use.

The result? Consensual solutions that truly make sense and quicker acceptance (and approval) of recommendations.

With an understanding of the full range of considerations related to transportation planning, including: policy trends, supportive transportation/land use relationships, community mobility needs, transit operations and facility requirements, site development and traffic impacts, and engineering standards.

Based on established principles.

ENTRA is committed to delivering an exceptional level of client service and to the formulation of innovative transportation solutions that respond to the needs of the client and the community.

ENTRA believes in actively soliciting community involvement in the planning process to improve the quality of life for all.

Achieving consensual solutions through open communication and effective facilitation, blending vigorous analysis and qualitative assessment.

One that supports sustainable development while providing choice of travel mode and reducing reliance on the automobile.

ENTRA believes in freedom of access and mobility for all individuals in our society. We strive to achieve a balanced transportation system where access to public transportation is convenient.

ENTRA supports coordinated transportation and land use planning as a means of achieving integrated solutions that reflect the complex relationship between transportation and land use.

ENTRA supports the use of transit as an alternative to travel by automobile and believes in the integration and coordination of all public transportation services to better serve community needs.

ENTRA is committed to the development of safe and effective methods of moving people and goods, and to the efficient use of existing and proposed transportation facilities.

Transportation Planning services to achieve success.

ENTRA Consultants Inc. is a specialist in:

- ☑ Integrating transportation planning with land use planning and urban design to achieve sustainable development.
- ☑ Evolving effective transportation planning solutions that are supportive of social and environmental protection objectives.
- ☑ Formulating transportation policies, guidelines and requirements for incorporation in Official Plans, Secondary Plans, zoning by-laws or planning guidelines.
- ☑ Coordinating community-based transportation systems to best serve the needs of the general public, students, persons with disabilities, social service programs and health facilities.
- ☑ Conducting transit planning and operational reviews for the entire family of transit services, including conventional, specialized and community-based transit.
- ☑ Planning inter-modal transportation facilities, including transit and inter-city bus terminals, commuter rail stations, rapid transit facilities and transportation “gateways”, and identifying opportunities to integrate facilities with development.
- ☑ Conducting stakeholder consultations, ranging from sessions with area representatives scoping local issues, to focus groups discussing particular issues, to public meetings and presentations in compliance with planning approvals.
- ☑ Facilitating discussions to resolve issues and reach consensus on solutions.
- ☑ Identifying traffic management strategies as part of the assessment of development.

"At ENTR A we believe that transportation is a vital link in building healthy communities."

"As ENTR A grows, we continue to add resources - not levels of hierarchy."
